Methodology

The Approach

We believe... schooling is not to make children expert technicians or to force them to become nerds. It is to tickle their minds for curiosity to take birth, widen their horizons, inflame their intellects and implant a zest to bring out the best in them.

We follow qualitative educational approach based on modern international norms. A strategically designed curriculum supplements the regular CBSE syllabus and creates scientific attitude, aesthetic sense, creative approach and sensitivity. This has only been enhanced with the introduction of the Continuous and Comprehensive Evaluation (CCE) in which the students are not burdened with the traditional pattern of learning. Frequent assignments, semester system and an innovative system of learning in the form of quiz, group discussions etc. bring out the students' potential and instill confidence.

His innovation has a perfect amalgamation of communication techniques, basic arithmetic skills, computer literacy, and dexterity in creative skills.

Instead of being burdensome, education is rather interesting for the *Prominents*.

This facilitates a life long retention of all that we teach.

Conceived after extensive research, The Bhavans' Prominent curriculum program is being implemented at four different levels:

- Bambino** – Nursery to Class I
- Basic** – Class II to Class V
- Advanced** – Class VI to Class VIII
- Masters** – Classes IX to XII
- Bambino** – **Nursery to Class I**

From times immemorial, curiosity has been an urge of the children and we respect and encourage it.

Basic – Class II to Class V

Learning is not about remembering tables or lessons by heart, it's about understanding them and remembering where and when to use them.

Advanced – Class VI to Class VIII

What experiments can teach you, even we can't! But you need to learn from us how to experiment.

Masters – Classes IX to XII

Perfection is fiction. At The Bhavans' Prominent, we aim at excellence.
